The Show

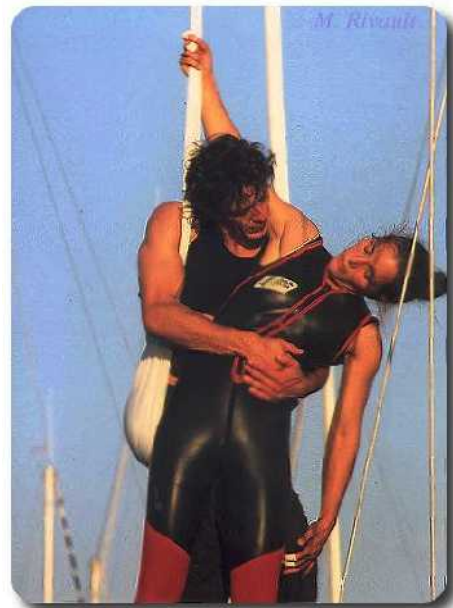

An aerial choreography mixing circus, theatre and dance, “Entre île et aile” is a poetic duo, travelling through humour and sensuality, fusion and friction.

Defying balance and gravity, on a shifting floor, a man and a woman navigate as tightrope walkers on the balconies, the bow, the mast and the deck of a sailboat.

They carry each other, jostle each other, look for each other and find each other between sea and sky.

On the way

Since 2004 they have been traveling around the world sharing this experience. They performed in Europe (France, Portugal 2005/06), in Africa (Morocco 2004/07), in French Caribbean (2007) and North America (Nova Scotia, Quebec 2007).

Unfolding of the show

The Loupiote sails in before the time of presentation to the show location or close by, to set up for the show. It can be docked at a port in front of the public during high tide.

Besides presenting "Entre île et aile" La Loupiote can also host other artists on its deck: storytellers, puppeteers and musicians. Videos and short films can also be projected onto La Loupiote's sails. Anything can be imagined in collaboration, to use this scenic space in new ways.
